

Go to <https://www.chiark.greenend.org.uk/~sgtatham/putty/latest.html>

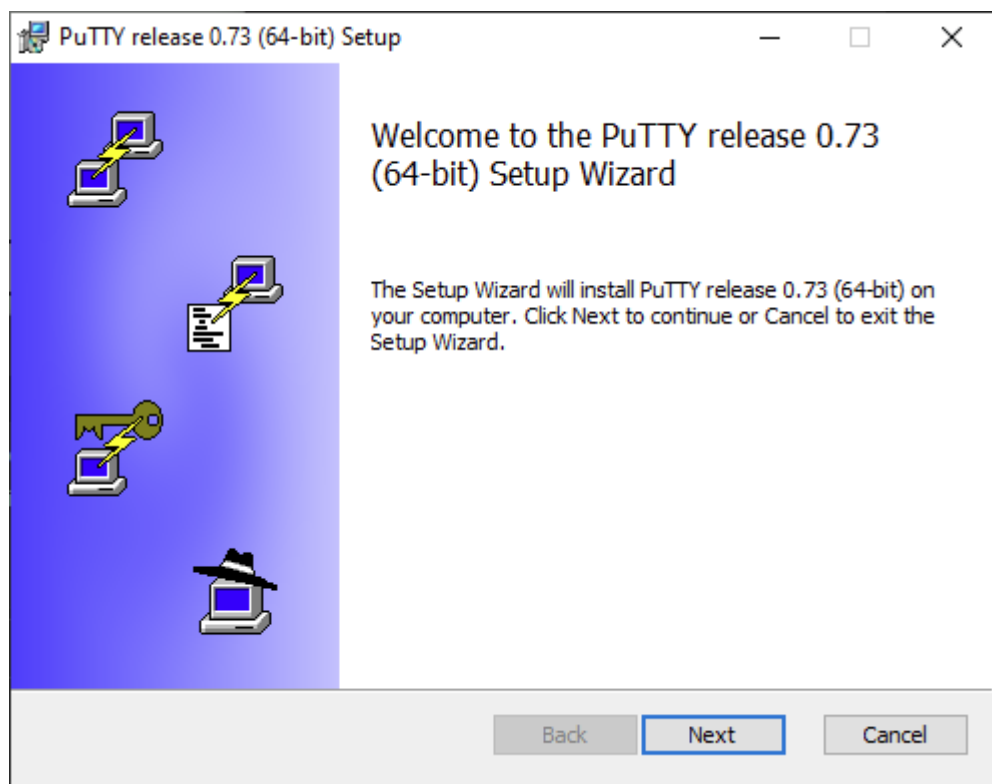

Package files

You probably want one of these. They include versions of all the PuTTY utilities.
(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

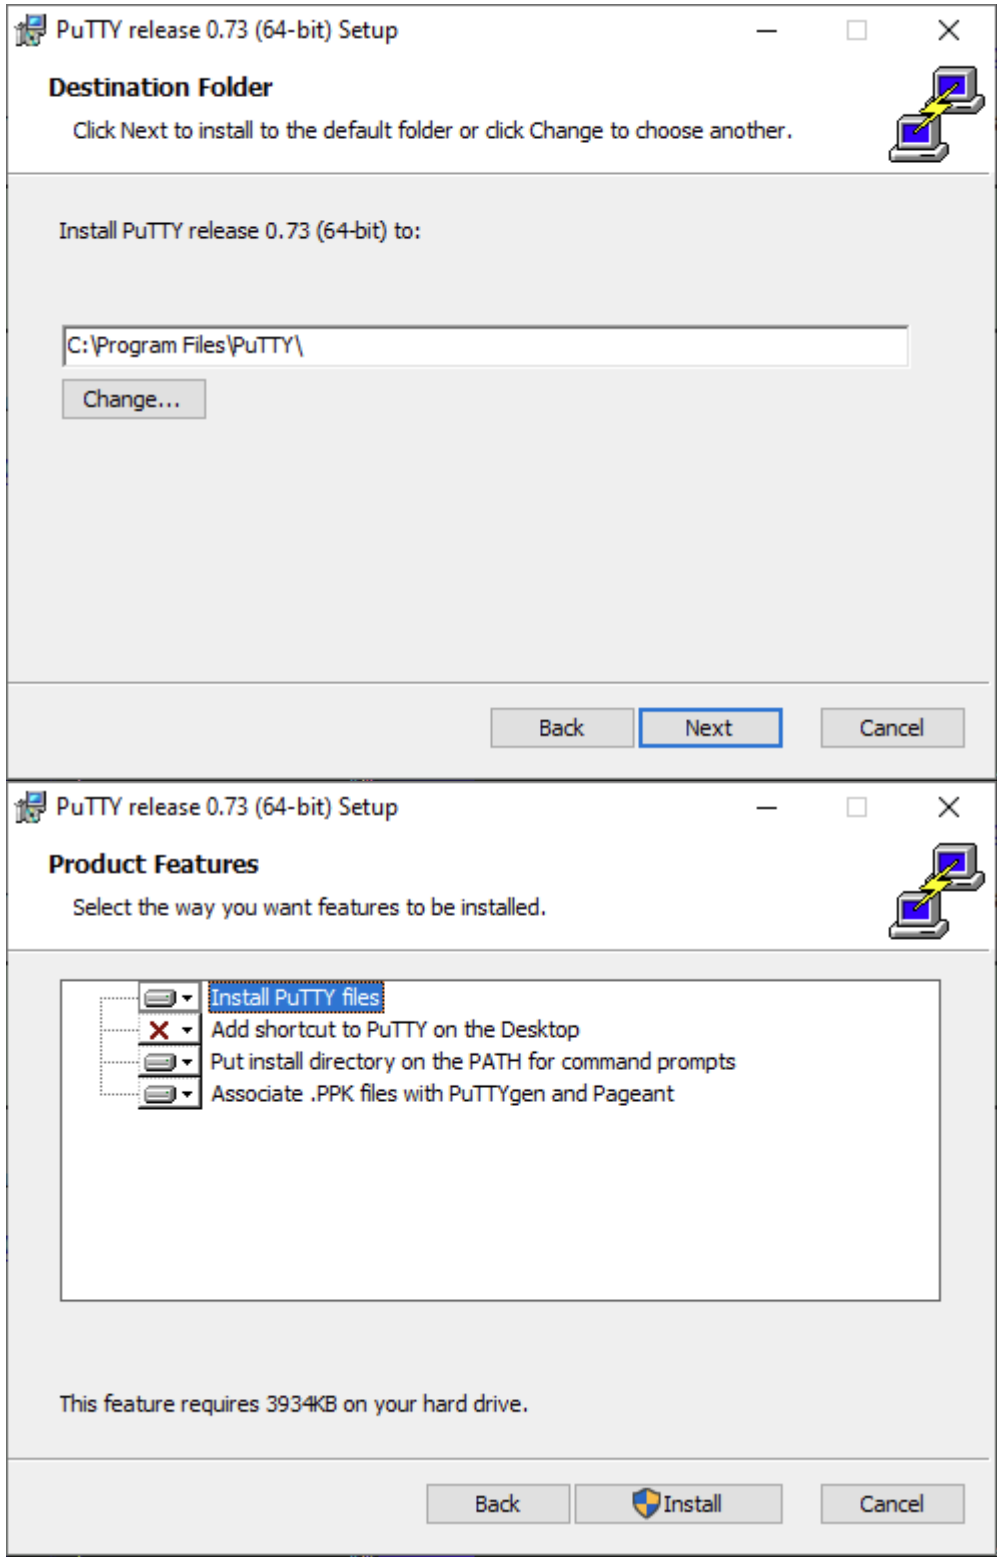

MSI ('Windows Installer')

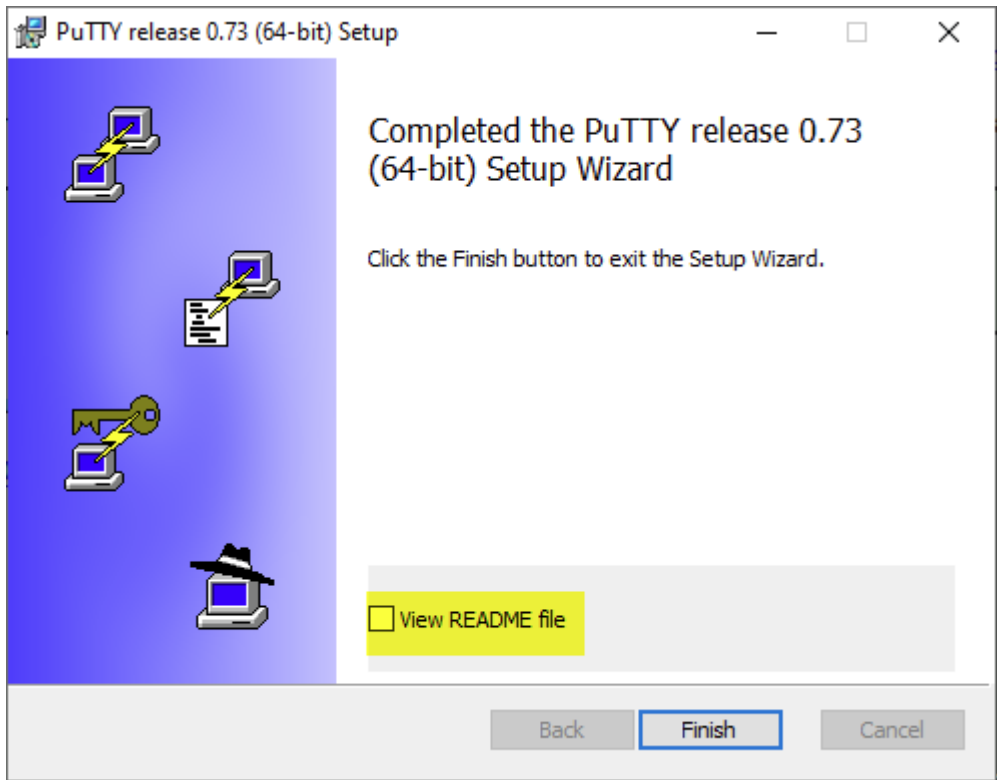

32-bit:	putty-0.73-installer.msi	(or by FTP)	(signature)
64-bit:	putty-64bit-0.73-installer.msi	(or by FTP)	(signature)

Download the last release of putty :

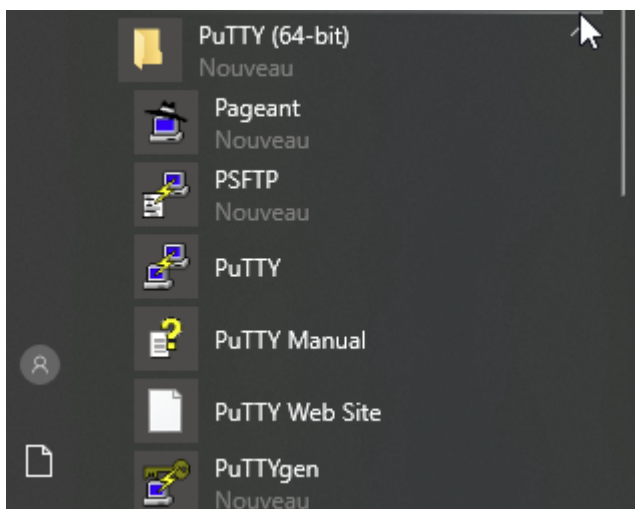

Start install of putty :

In the start menu you have multiple new applications under PuTTY folder :

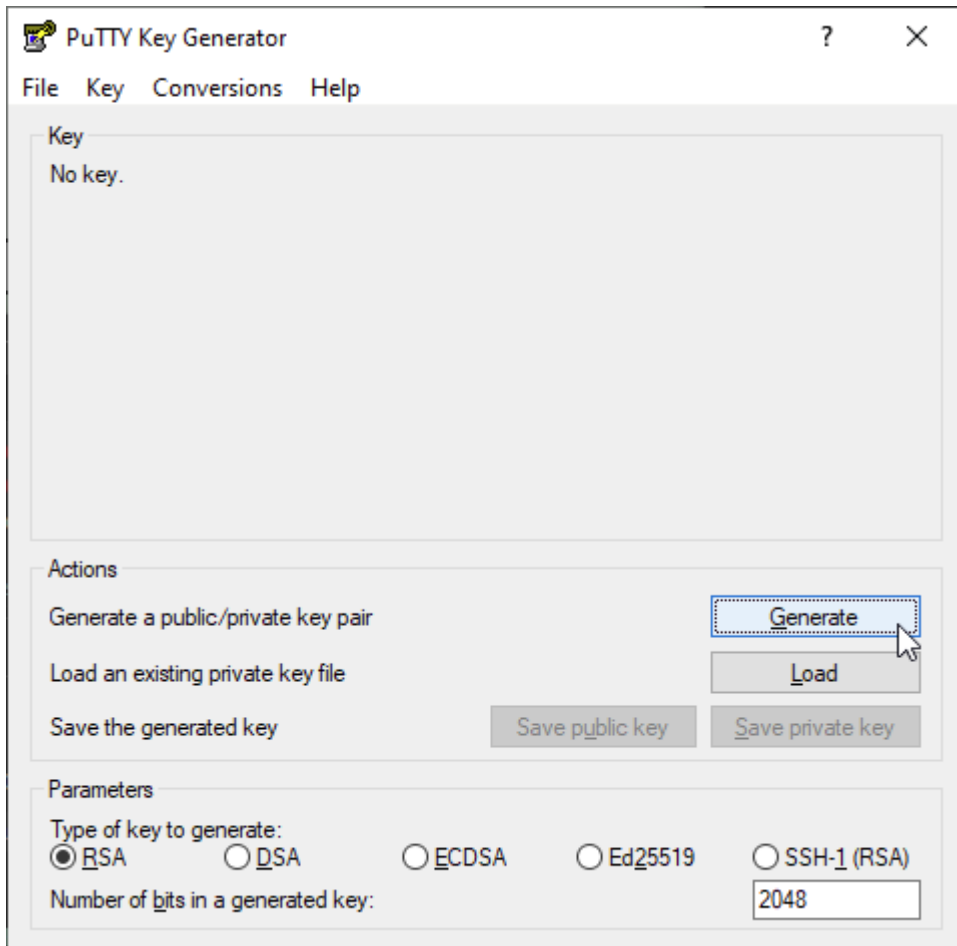

First step is to generate the SSH key. For this run the PuTTYgen

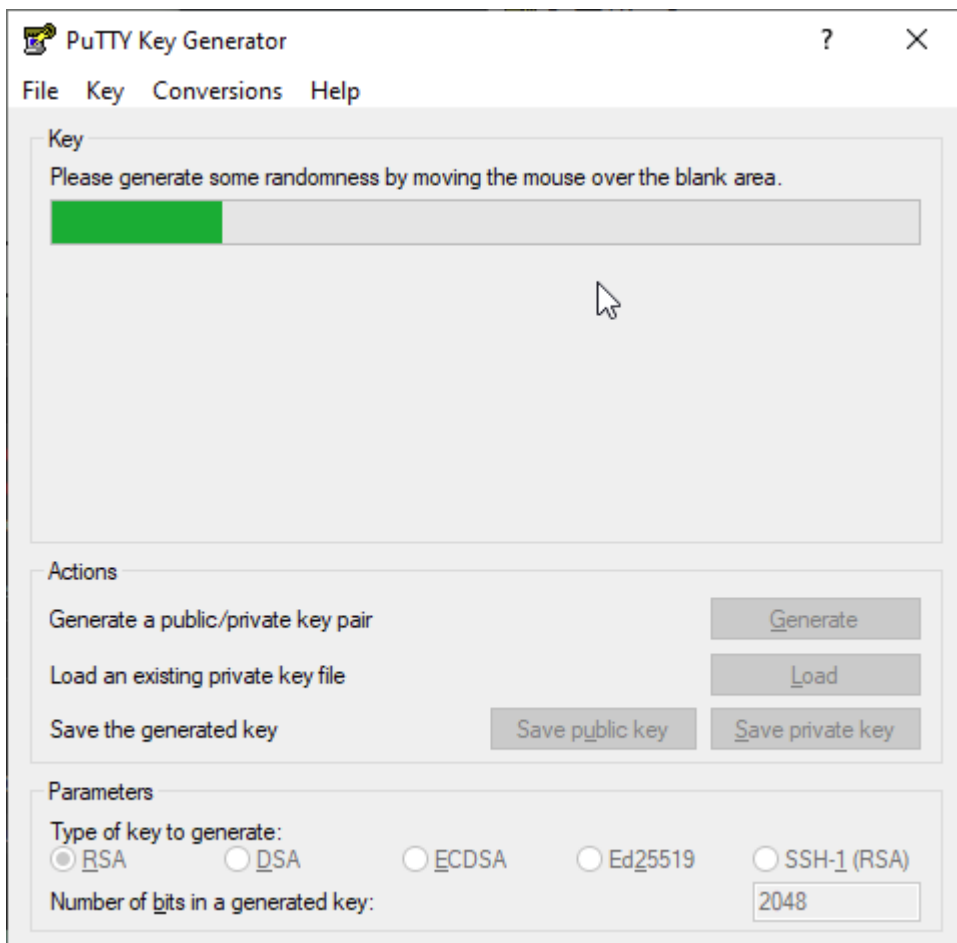

Click on Generate button

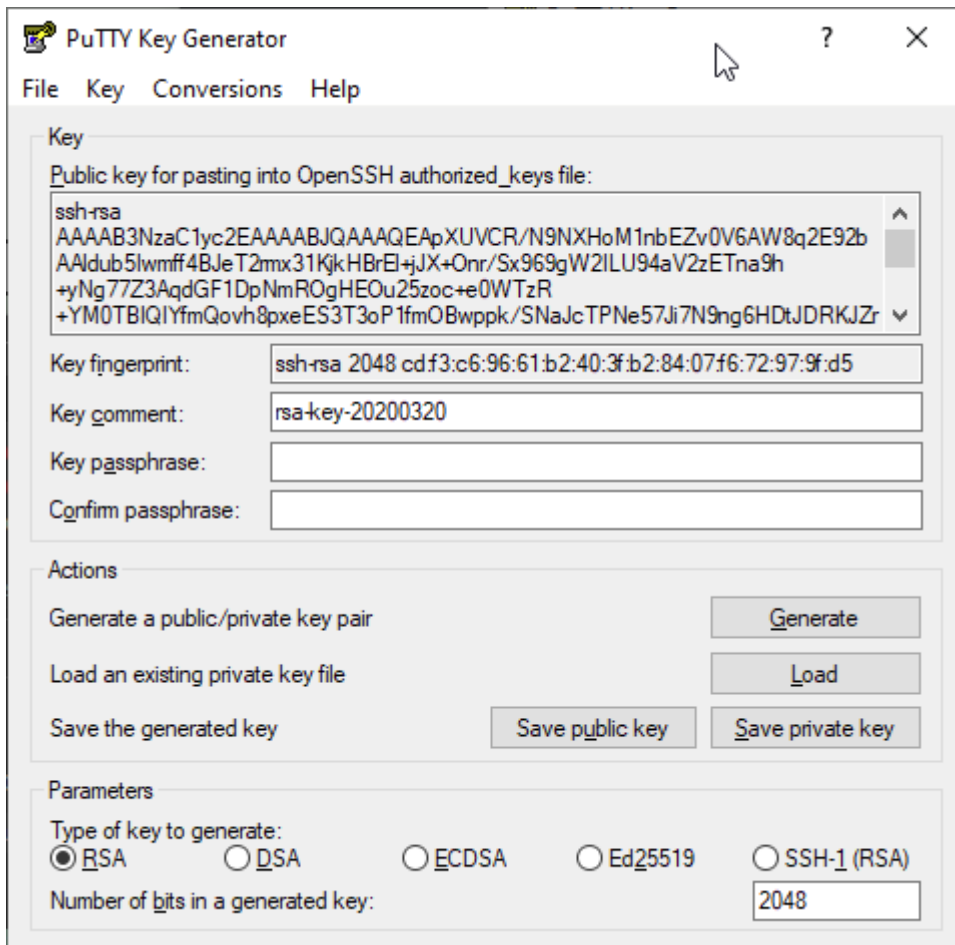

You need to move the mouse over the window

When completed you will get a new key

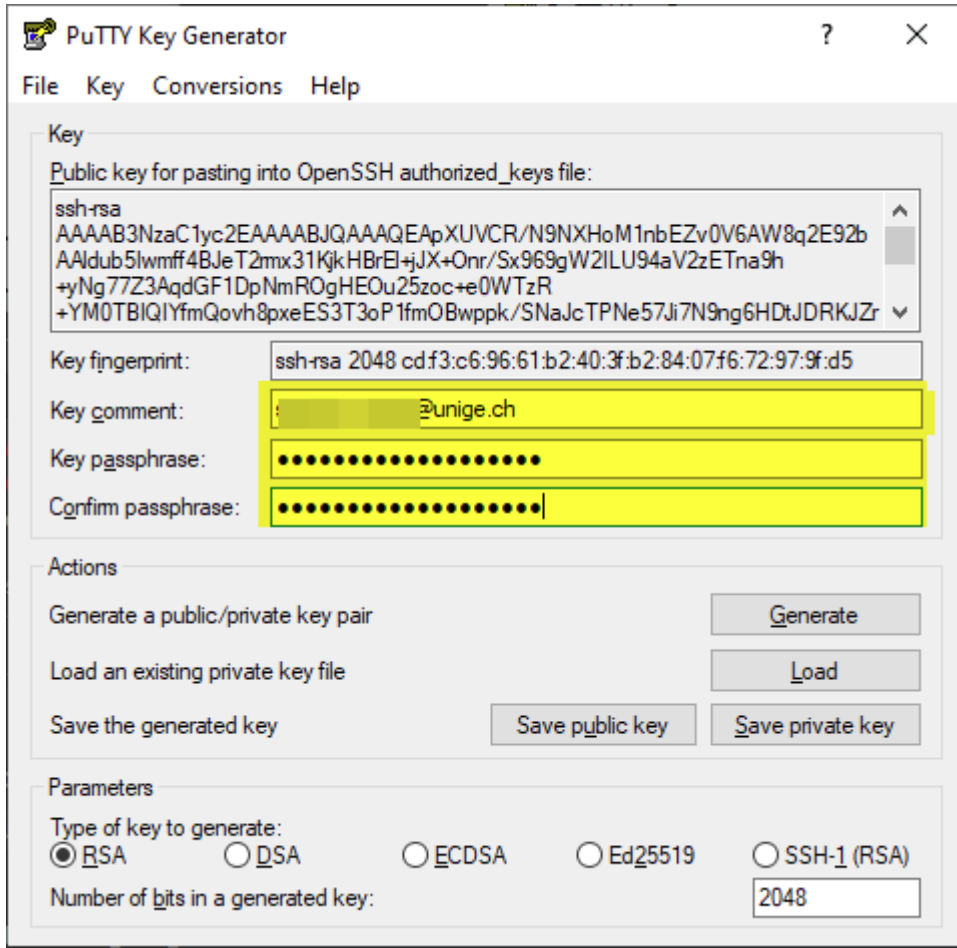

Before saving the key update the fields

In key comment put you email address

And enter a passphrase

Save the public key on you computer

Save your private key Keep this file in a safe location ! And be sure to have a backup ! There is no way to recover the private key !

Now you can provide the public key : Just do a copy paste of this field
