

On the Dashboard page click on the + button

The screenshot shows the OpenNebula dashboard header with navigation links for Dashboard, VMs, Templates, and Services. The user is logged in as 'huwilers'. The main content area is titled 'Virtual Machines' and displays a summary table with the following data:

Owner	Group	RUNNING	DEPLOYING	OFF	ERROR
0	1	0	0	0	0

A '+ Add' button is highlighted with a yellow box. A red badge in the top right corner of the dashboard area reads 'Not officially supported'.

Select the template for the VM. For the Linux make sure you have the [ssh public key configured on your account](#)

The 'Create Virtual Machine' form is shown with the 'Template' step selected. The 'Virtual Machine Name' field is empty. A 'Persistent' toggle is turned off. A green 'Create' button is visible. Below the form, a search bar and filter dropdowns are present. The template selection area displays four options:

- Debian 10 Image (Template Debian 10)
- Ubuntu 18 LTS (Ubuntu 18 LTS Image)
- Windows 2019 (Windows Server 2019 STD image)
- CentOS 8 (CentOS 8 image)

Enter a name for the vm

The 'Create Virtual Machine' form is shown with 'vmDemo' entered in the 'Virtual Machine Name' field. The 'Persistent' toggle remains off. The 'Create' button is green. The 'Template' dropdown is open, showing 'Debian 10 Image' selected.

Select Hardware resources. If you don't know what to allocate, start with low resources (default values) you can still upgrade afterwards

Capacity 0.01 COST/HOUR

Memory GB

CPU

VCPU

Disks 0.000457 COST/HOUR

DISK 0: t-cloud-centOS8-one GB

Add a network interface

Network

Select the network You have the choose to use :

- private network : in this case the vm will be accessible from the unige network or vpn but it's more secure.
- public network : with this configuration the VM is accessible directly form internet without any security. You will need to setup the firewall and take care of security.

Please select a network from the list

ID	Name	Group
4	Cloud Private IP (10.40.41.0)	oneadmin

Showing 1 to 1 of 1 entries Previous 1 Next

Add only one interface ! don't press again on "+Network Interface"

Select the storage :

Datastore

You selected the following datastores:

CloudStorage [vccloud.unige.ch - Cloud] (StorDRS)

ID	Name	Owner	Group	Status
119	CloudStorage [vccloud.unige.ch - Cloud] (StorDRS)	oneadmin	oneadmin	ON

Showing 1 to 1 of 1 entries

Now you can connect to the vm. Using the IP shown on the interface :

Then you can login with your ssh private key

If you need information on how to use your private key. You can follow the documentation : [use private ssh key on windows](#)

```
10.40.41.11 - PuTTY
login as: root
Authenticating with public key "rsa-key-20180727" from agent
Linux sdfsfgsfdgs 4.19.0-5-amd64 #1 SMP Debian 4.19.37-5+deb10u2 (2019-08-08) x86_64
