

First you need to have and SSH key pair If you don't have ssh key pair you can follow the procedure to [create a new pair \(windows\)](#)

Connect to :

<https://cloud.unige.ch>

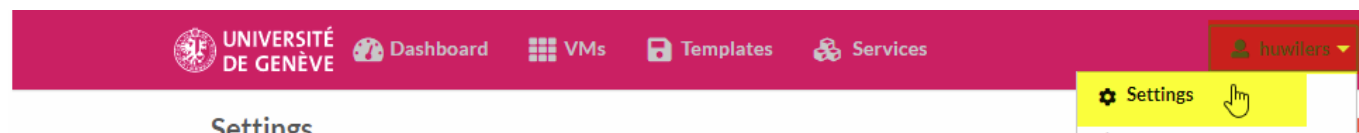

And login with you ISIS Account :

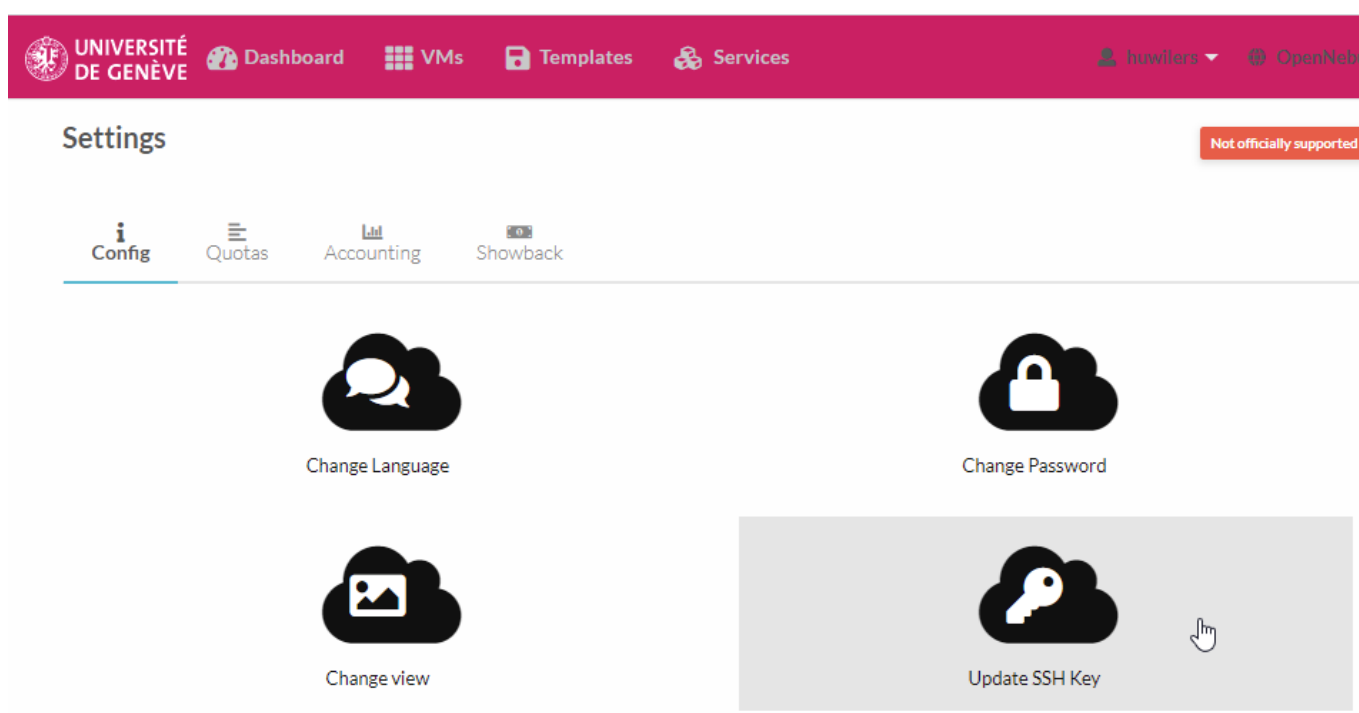

A login form with a light gray background. It contains two input fields: 'Username' with the text 'huwilers' and 'Password' with masked characters. Below the password field is a checkbox labeled 'Keep me logged in' and a 'Login' button. A key icon is visible on the right side of the password field.

After the first login et before deploying a virtual machine, you need to configure your SSH Key

Go to Settings

Click on Update SSH Key :

Enter you SSH public key :

Update your public SSH key!

You will be able to access your Virtual Machines without password

`ssh-rsa`

Update SSH Key
