Power off tooltip

This action will power off this Virtual Machine. The Virtual Machine will remain in the poweroff state, and can be powered on later

You can send the power off signal to the Virtual Machine (this is equivalent to execute the command from the console). If that doesn't affect your Virtual Machine, try to Power off the machine (this is equivalent to pressing the power off button in a physical computer).

Power off the machine  Send the power off signal

Power off

# demodeb2

**POWERING OFF**
